Era: 1963 to 2004

- All new tooling
 - Die-cast underframe
 - Raised and lowered hitches included
 - 70-Ton roller bearing trucks with rotating bearing caps
 - Prototypical ride height
 - High or low handbrake per prototype
 - Use in dedicated intermodal trains or in regular mixed freight trains
 - Perfect with Athearn 40', 45' and 53' trailers, and all 20', 40', 45', 48' and 53' containers on chassis
 - **Minimum radius - 22"**
- Tall or short bridge plates per prototype and era
 - Early or late train lines and cut levers per prototype and era
 - Detailed deck
 - Body mounted McHenry® scale knuckle spring couplers
 - Laser-sharp painting and printing
 - Wireform brake plumbing

Please Note: We've gotten a lot of requests to run more road numbers of these two specific versions of our first release of this great car body. We won't run this body again for a while - we have several more body types that we want to produce first.
