Single car: \$19.98 5-Pack: \$84.98

MODEL FEATURES

- 11 different road numbers
- Removable coal load
- 100 ton roller bearing trucks
- Minimum radius: 9 3/4"

N SCALE FREIGHT CAR FEATURES

- Multiple road numbers
- Fully-assembled and ready-to-run out of the box
- Accurately painted and printed
- Highly detailed, injection molded body
- Separately applied brake wheel
- Machined metal wheels
- Screw mounted trucks
- McHenry operating knuckle couplers
- Weighted for trouble free operation
- Clear plastic jewel box for convenient storage
- Operates on Code 55 and 80 rail

PROTOTYPE INFORMATION

The Bethgon Coalporter is a modern rotary dump coal gondola built by Freightcar America. The Bethgon is built of aluminum to lower the car's empty weight to about 21 tons thus increasing the amount of coal that can be carried. One of the most important parts of the Bethgon is the longitudinal tub floor design, which allows for an extra 18 tons of coal over earlier flat bottom designs. This also lowers the car's center of gravity for better stability.
