4-8-8-4 Big Boy

The Genesis™ 4-8-8-4 Big Boy has been a huge success. The next logical step is to offer this massive model with factory weathering, replicating their in-service appearance.

Features include:

- Boiler backhead with full details and printed gauges.
- Individually applied detail parts such as piping, valves, generators, etc.
- Blackened metal RP25 wheels.
- Eccentric cranks operating on both sides in correct direction.
- Front and rear engines (cylinders and coupled drive wheel sets), both pivot for 22" recommended min. radius.
- Pilot has open/closed positions. Coupler pocket can be inserted to mount coupler.
- Adjustable cab windows and opening doors.
- Headlights and tender lighting feature directional light change; number boards are also lighted.
- Five-pole, skewed armature motor with two flywheels for very smooth running.
- Cab hatches can be either closed or open.
- See-through running boards.
- Ready for aftermarket smoke unit installation with no soldering needed.
- Factory installed DCC sound board and speaker. The board and speaker are mounted in the tender.
- DCC decoder automatically senses the power supply type (either DC or NMRA compliant DCC system).
