All Road Names

PROTOTYPE AND BACKGROUND INFO:

Pullman Standard introduced the all steel PS-1 box car in several different sizes including 40', 50' and 60' lengths. Multiple door configurations and styles made these box cars very flexible. Pullman Standard had their own signature details, such as rolled non-terminating ends, and bow-tie stamped metal roofs. These were signature elements that identified the PS-1 among the other freight car builders of the time.

MODEL FEATURES:

- Scale profile brake wheel
- Roller bearing or Bettendorf trucks
- Accurately painted and printed
- Machined metal wheels
- McHenry knuckle couplers
