All Road Names

PROTOTYPE HISTORY:

The most common caboose form in American railroad practice has a small windowed projection on the roof, called the cupola. The crew sat in elevated seats to inspect the train from this perch. Some railroads, chiefly the Eastern and some granger roads, also built or upgraded cabooses with streamlined cupolas for better aerodynamics and to project a more modern image.

MODEL FEATURES:

- Highly-detailed, injection-molded body
- Separately applied brake wheel
- Machined metal wheels
- Weighted for trouble free operation
- Wheels with RP25 contours operate on all popular brands of track
- Body mounted McHenry® operating scale knuckle couplers
- Window packaging for easy viewing plus interior plastic blister safely holds the model for convenient storage
- Replacement parts available
- Minimum radius: 15"
