- Minimum Radius 22" — Recommended Radius 24"

#### PROTOTYPE AND BACKGROUND INFO:

Starting in the late 2010s, National Steel Car began construction of these giant 6,000 cu ft capacity gondolas. These exquisite Athearn Genesis models capture all of the details and variations of their prototypes. Our state-of-the-art tooling replicates the detailed bodies and massive dimensions of the prototypes. Separate details include full brake rigging, grab irons and etched crossover platforms. Add the definitive NSC 6000 gondolas to your modern roster with these all-new Athearn Genesis cars.
