All Road Names

MODEL FEATURES:

- Factory assembled with detail parts applied
- Molded interior with separately applied steering wheel
- Clear window glazing
- Rubber tires
- Beacon or taxi sign where appropriate

PROTOTYPE SPECIFIC INFORMATION

A taxi is a type of vehicle for hire with a driver, used by a single passenger or small group of passengers, often for a non-shared ride. A taxicab conveys passengers between locations of their choice. This differs from public transport where the pick-up and drop-off locations are decided by the service provider, not by the customers, although demand responsive transport and share taxis provide a hybrid bus/taxi mode.

A sedan is a passenger car in a three-box configuration with separate compartments for an engine, passengers, and cargo.
