HO ACF 4-Bay Covered Hopper

Announced 12.30.16
Available for Backorder

All Road Names

ETA: November 2017

PROTOTYPE INFORMATION:

The 4-bay covered hopper first entered service in the 1960s. The cars handle loads such as diatomaceous earth, plastic pellets and similar bulk commodities. In the 1960s, American Car and Foundry introduced the Center Flow design. The Center Flow relies on the car's rounded body to provide structural strength without the added weight of bracing, as well as making gravity unloading easier. This 4-bay car came in a 5,250-cubic foot capacity.

MODEL FEATURES:

- Round hatches
- Painted and printed for realistic decoration with multiple road numbers
- Fully-assembled and ready to run
- Highly-detailed, injection-molded body
- Separate brake wheel
- Weighted for trouble free operation
- Machined metal wheels with RP25 contours operate on all popular brands of track
- Body mounted McHenry operating scale knuckle couplers
- Window packaging for easy viewing
- Interior plastic blister carton safely holds model for convenient storage
- Minimum radius: 18"
