MODEL FEATURES:

Yard Tractor

- Completely assembled
- Many separately applied parts
- Interior details
- Rubber tires
- Photo-etched steps and rear deck
- Adjustable 5th wheel height
- Clear window glazing

45' Container

- Fully assembled
- Easily stackable

45' Chassis

- Fully assembled and ready for your layout
- Contemporary paint schemes

PROTOTYPE AND BACKGROUND INFO:

An intermodal container, often called a shipping container, is a large standardized shipping container, designed and built for intermodal freight transport. These containers can be used across different modes of transport – from ship to rail to truck – without unloading and reloading their cargo. Intermodal containers are primarily used to store and transport materials and products efficiently and securely in the global containerized intermodal freight transport system.

A container chassis, also called intermodal chassis, is a type of semi-trailer designed to securely carry an intermodal container. Chassis are used by truckers to deliver containers between ports, rail-yards, container depots, and shipper facilities.

\$69.99 TRACTOR with CONTAINER AND CHASSIS
